

# GlobalX PPSR Solutions

Features	Benefits	GlobalX	PPSR
<b>General Features</b>			
Easy to use interface with glossary and tool tips	Anyone in your organisation can pick up and use the GlobalX PPSR system. Tool tips on all input fields provide valuable guidance through the process of searching and registering items via GlobalX.	✓	✗
PPSR services integrated with your searching account	You have one place to acquire all your information products, one set of logins and one invoice to pay at the end of the month. Using PPSR direct will require Credit Card payment unless you sign up for a separate account with Director's Guarantees.	✓	✗
<b>Registrations</b>			
Verify VIN serial number before registration	Ensure you have the correct VIN, and avoid a defective or inaccurate registration.	✓	✗
Verify Organisation Grantors before registration	Ensure the grantor is correct, understand the status of the grantor, and ensure you register by the correct organisation number. This ensures you have the best possible information before submitting the registration, and avoids defective registrations due to incorrect grantor details.	✓	✓
Ability to save an order as draft	PPSR offer facilities to save a draft for 7 days called 'Pending Status'. GlobalX allows you to save orders and return to complete them within 10 days.	✓	✓
Delivery of Verification Statements to intelli-Doc	Using our SPG Management system, your Verification Statements will be copied automatically to intelli-Doc, minimising the risk of delivery failure via email. Guaranteed delivery gives you peace of mind, and ensures your obligations to distribute the Verification Statement to the grantors can be met.	✓	✗
Clone registration details	Enables you to create a new registration by cloning details from an existing registration. This saves time re-keying information required to create new registrations.	✓	✗
Send registration details for approval	With a single click you can email registration details to approvers for their review before submitting the registration. This helps accelerate your internal approval process.	✓	✗
Batch services	Batch services for large volumes of registrations, discharges, transfers and renewals improves your efficiency and minimises risk of errors by removing the need to re-key data into web forms.	✓	✗
Registration administration, including transfers, discharges and amendments	Enable you to adjust any registrations, and conduct normal business activities against these registrations.	✓	✓
Simple renewals	Enable you to follow a simple workflow to renew expiring registrations that are still in effect—speeding up your processing. This avoids requirements to complete the full complex amendment workflow otherwise required, when using PPSR.	✓	✓
Re-issue Tokens for Registrations	Allows you to re-issue your registration tokens for old or migrated registrations, if you wish to pass these on to incoming financiers at transfer / discharge.	✓	✓

Features	Benefits	GlobalX	PPSR
Secured Party Group Management			
Secure Access code storage for SPG Management	Allows authorised users to conduct activity on your SPG without knowing the Access Code—decreasing your security risk.		
Post RCT Find & Claim	Establish if any Secured Party Groups have been created for you by the migration process, and 'claim' these by transferring the registrations to a new SPG.		
Easy to use access management	Quickly set up roles for each of your users, including authorisation to view and modify SPG details, conduct activity against SPGs, etc. "Set-and-forget" roles allow you to manage security with speed and confidence.		
Transfer all registrations from one SPG to another	Provides the ability to manage your Secured Party Groups following initial data migration, through acquisitions, or if your organisation number changes.		
Enable secure access to your SPG to agents	Where you use agents to conduct activity on your behalf, you may allocate the SPG to that agent, without issuing the Access Code. This provides enormous operational efficiency without compromising security.		
Searching			
Verify VIN serial number before searching	Ensure you have the correct VIN, and avoid a search on the wrong asset, which would undermine your credit assessment.		
Verify Organisation Grantors before searching	Ensure the grantor is correct and you are using the correct organisation number before conducting your search—so that you search on the correct name, and avoid getting false positive results.		
Search PPSR by serial number, grantor name, or registration number	Enables you to conduct a review of competing securities against a number of criteria, or to collect a search result on a specific registration.		
Ordinal search	Allows you to compare the event dates of two competing registrations, for example compare start dates to get an indicator of priority.		
Deliver all certificates and attachments in zip file	GlobalX's system will deliver all certificates and attachments in zip file(s) to Intelli-Doc, to make it easy for you to save all results to your local drive.		
Reporting & Billing			
List of registrations on an SPG	Provides a complete listing of all registrations held against an SPG.		
Full activity reports	Indicates all activity against your SPG, which is important for auditing purposes.		
Billing reports	Shows you who has conducted what transactions, with costings. This is useful for reconciliation with your invoices.		
Features	Benefits	GlobalX	PPSR
Manual Services			
Document Acquisitions Service	GlobalX provides an investigative service to track down documentary evidence related to security interests held by other Secured Parties. This can be critical during your credit assessment and provides useful insights into your level of risk if competing registrations are made.		
National Lodgements Service	Protect your interests held over commercial grantors by securing caveats or mortgages over real property held in their name.
